

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Plan of the Index.....	vi
List of Collections Indexed.....	vii
Key to Abbreviations.....	xi
Index to Kindergarten Songs.....	1
Lists of Songs for Special Days.....	279

PREFACE

This index, the plan of which is similar to that of the well known Granger index to recitations, was suggested by demands from St. Louis kindergartners for the location of songs for which they were searching. The idea is due to Mrs. Harriet P. Sawyer, Chief of the Instruction Department in the St. Louis Public Library, and valuable preliminary work was done also by Miss Effie L. Power, Supervisor of Children's Work, and by Miss Margaret Curran, Children's Librarian at the Divoll Branch. The Librarian has had nothing to do with it except to give advice occasionally in matters of policy.

It was expected at first that the St. Louis Public Library would publish the index, but it has proved to be larger than was anticipated, and the Publishing Board of the American Library Association has kindly relieved us of this part of the enterprise.

ARTHUR E. BOSTWICK,
Librarian St. Louis Public Library.

PLAN OF THE INDEX

Three types of books are indexed:—those containing only kindergarten songs, those containing both kindergarten and folk songs, and those including folk songs only.

The collection indexed includes the following classes of books:

(1) Books recommended by the Kindergarten Normal Department of the St. Louis Board of Education; (2) Books of songs and games given in the A. L. A. Catalog, its Supplement and the A. L. A. Booklist; (3) All other kindergarten-song books in the collection of the St. Louis Public Library.

Sixty-three books are indexed. The list aims to be comprehensive but is not recommended as a discriminative check-list for purchase. No kindergarten magazines have been indexed.

The index is patterned on Granger so far as the form of entry is concerned. The entries, all in one alphabet, are by composer, first line, title and author of the words when he is at all important. There are no subject headings in the main index, although a separate list of songs for special days will be found at the end.

Whenever there is a variation, whether in composer, first line or title, this is brought out in parenthesis below the entry. The variations appear in every entry of any given set. In groups where it was not possible to determine which was the parent song and which the versions, each song has been called a *variant* in accordance with the practice of the American Folk-lore Society.

An asterisk indicates that the first line and the title begin with the same words.

MARGERY QUIGLEY.
